Programmable Controller Features

- Each Controller is completely epoxy potted, which eliminates all controller failures due to vibration and water corrosion.
- These controllers produce up to 60% less heat than many competing controllers.
- Programmable. After plugging the controller into your computer (loaded with Windows) with a standard serial cable, you can set various performance characteristics.
- All 300 & 400 Amp EZ-GO controllers fit under the EZ-GO lid!!!
- Full Two (2) Year Warranty
